

## Frustration Survey

Have you ever wanted to tell your doctor just what you think of them? Or their clinic and the staff? Well here's your chance; please be honest and let us know what you think of doctors, the healthcare system and health in general. Any recommendations would be greatly appreciated so we can make our clinic a better experience for you and your family.

1. What is the #1 thing that frustrates you with the healthcare system?
2. What frustrates you about doctors specifically?
3. What do you find most frustrating in regards to Naturopathic Doctors specifically?
4. What, if anything, do you think needs improvement in doctor's offices (staff, sitting area, washrooms, etc.)?
5. How would you improve how medical care is delivered in general?
6. Any other recommendations for our clinic or our website?

*Thank you for taking the time to complete this survey. This will provide information on how we can best serve you and your family.*
